

## Schedule 2.5 – NIO IFF VI SCSp – Subscription application

Key information document								
Purpose								
This document provides you with key information about the investment product NIO Infrastructure Feeder Fund VI SCSp. The document is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you to compare it with other products.								
Product								
<b>Name:</b> NIO Infrastructure Feeder Fund VI SCSp <b>PRIIP manufacturer:</b> Nordic Investment Opportunities A/S <b>Date:</b> 8 December 2025	<b>Contact details:</b> +45 61 51 19 30 <b>Website:</b> <a href="http://www.nio.partners">www.nio.partners</a> <b>Competent Authority:</b> The Danish Financial Supervisory Authority							
<b>AIFM</b>	Nordic Investment Opportunities A/S (“NIO”), Authorised in Denmark and under supervision of the Danish Financial Supervisory Authority							
Comprehension alert: You are about to purchase a product that is not simple and may be difficult to understand.								
What is this product?								
<b>Type</b>	Partnership interests in NIO Infrastructure Feeder Fund VI SCSp (the “Product” or “NIO IFF VI”), which is organised as a Luxembourg limited partnership. The Product qualify as an alternative investment fund in accordance with Directive (EU) 2011/61. Moreover, the Product has sustainable investments as its objective in accordance with Article 8 of the SFDR Regulation.							
<b>Term</b>	The term of this Product shall continue until the expiry of the term of the Copenhagen Infrastructure VI SCSp (“CI VI” or the “Masterfund”). NIO is not entitled to terminate the Product unilaterally, but the retail investors cannot prevent the Product’s termination, which is to be decided at a general meeting of NIO IFF VI. The Fund’s term shall expire on the first 31st December following the 14th anniversary of Final Closing (the “Term”) being 2040. The Term may be prolonged by one (1) year by the General Partner in its absolute discretion and, subject to LPAC approval (CI VI LPAC), a further three (3) additional one-year periods.							
<b>Objectives</b>	<p>NIO IFF VI is a fund managed by Nordic Investment Opportunities A/S (“NIO”), which has been authorised as manager of alternative investment funds by the Danish Financial Supervisory Authority. NIO IFF VI invests solely in CI VI, provided that the Product may make co-investments alongside CI VI. CI VI is managed by Copenhagen Infrastructure Partners P/S (“CIP”), which has been authorised as manager of alternative investment funds by the Danish Financial Supervisory Authority.</p> <p>The objective of CI VI (and consequently also NIO IFF VI) is to generate an aggregated return for the investors through sustainable investments in energy-related and digital-related infrastructure assets. The assets shall primarily be within the OECD countries in Western Europe, North America (United States and Canada) and the Asia-Pacific region (currently Australia, New Zealand, Japan, and South Korea) (the “Underlying Investments”). CI VI has sustainable investment as its objective in accordance with Article 8 of the SFDR Regulation and has climate change mitigation and adaption as environmental objectives. The return on the Product depends on the return generated by the direct investment in or co-investments with CI VI.</p>							
<b>Intended retail investor</b>	The Product is offered to retail investors defined in section 5(5)(i)-(ii) of the Danish Act on Alternative Investment Fund Managers, etc. The Product is intended only for retail investors with sufficient theoretical knowledge of and past experience with infrastructure or private equity funds who can bear the loss of their investments, with a long investment horizon, and who can accept that it is not possible to cash in the partnership interests from time to time.							
<b>Redemption</b>	The Product is expected to mature upon CI VI’s disposal of its investments or upon NIO IFF VI’s disposal of its investment. It is not possible to demand that the Product be cashed in, and the Product is generally non-transferable. Any request for sale of the Product cannot be guaranteed to be met, and a decision on such a request will be made on a case-by-case basis.							
<b>Depository</b>	CSC Depository Services (Luxembourg)							
<b>Where to obtain further information</b>	<a href="http://www.nio.partners/policies">www.nio.partners/policies</a> Nordic Investment Opportunities A/S Kronprinsessegade 8, 1. DK-1306 Copenhagen CE@nio.partners							
What are the risks, and what could I get in return?								
Risk indicator								
<table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> <td style="text-align: center;">3</td> <td style="text-align: center;">4</td> <td style="text-align: center;">5</td> <td style="text-align: center; background-color: #cccccc;">6</td> <td style="text-align: center;">7</td> </tr> </table> <p style="text-align: center;">  </p>		1	2	3	4	5	6	7
1	2	3	4	5	6	7		
								

The risk indicator assumes you keep the Product for the entire expected term, which is expected to be approximately 14 years, and which may be extended by up to 4 years. The risk of the Product may be considerably higher if the Product is not held throughout its term. The Product is non-liquid. The summary risk indicator is a guide to the level of risk of the Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. We have classified the Product as 6 out of 7, which is the second highest risk class. This means that potential losses on future performance are assessed to be at a high level, and poor market conditions will very likely impact the capacity of the Product to pay you.

**Please be aware of currency risks:** The Product is denominated in EUR, while the Underlying Investments may take place in companies that are exposed to currency risks. The final return you receive depends on the exchange rate between the two currencies. The above indicator does not take this risk into account. The risk profile reflects the risk related to investment in CI VI, including macro-economic, political, financing- and currency exposure related to investments in infrastructure related activities. This product does not include any assurance against the future market development, meaning you may lose partial- or the entirety of your investment.

### Performance scenarios

Investment per commitment of EUR 10,000		
Recommended holding period: 15 years		
Scenarios		15 years
Minimum	There is no guaranteed minimum return. Investors may potentially lose their entire investments	
Stress scenario	<b>What you might get back after costs</b> Average return each year	EUR 12,091 2.0%
Unfavourable scenario	<b>What you might get back after costs</b> Average return each year	EUR 14,644 5.3%
Moderate scenario	<b>What you might get back after costs</b> Average return each year	EUR 15,947 7.4%
Favourable scenario	<b>What you might get back after costs</b> Average return each year	EUR 17,257 9.7%

This table shows the money you could get back over 15 years under different scenarios, assuming you invest EUR 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The calculations of performance scenarios are based on an investment commitment of EUR 10,000 with an assumption of all EUR 10,000 having been invested from admittance to NIO IFF VI, and that the return on such amount corresponds to the expected net IRR of the Product based on ongoing capital contributions of the minimum commitment amount to NIO IFF VI.

Typically, commitment-based investments like NIO IFF VI will involve ongoing capital drawdowns throughout the investment period of NIO IFF VI and CI VI. As the Product is not intended to be cashed in and retail investors only in exceptional cases will be ordered or offered to sell their partnership interests during the holding period, only scenarios at the end of the holding period are included.

The scenarios presented are an estimate of future performance based on evidence from the past for similar investments showing how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the Product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where NIO is not able to pay you.

You do not have a general right to cash in the Product. This means that it is difficult to estimate how much you will get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the Product itself but may not include all the costs that you pay to your advisor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### What happens if NIO is unable to pay out?

Retail investors may suffer financial losses in case of NIO's breach of its obligations to NIO IFF VI or CIP as this may adversely impact the development of the Product. Retail investors may suffer financial losses in the event of a negative development of the Product, which results in NIO being unable to pay out. No such losses are covered by any kind of investor compensation or guarantee schemes. Retail investors may potentially lose their entire investments.

### What are the costs?

The annual reduction in yield (RIY) shows the impact of the total costs on the expected return on the Product. The total costs are one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the Product itself at the end of the holding period. The calculations include both costs of the Product itself and CI VI. The figures assume you commit EUR 10,000. The figures are estimates and may change in the future.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does. The amounts shown here are illustrations based on an investment amount of EUR 10,000. We have assumed that the product performs as shown in the moderate scenario. Cost include indirect cost inside CI VI.

Investment per commitment of EUR 10,000	
In the moderate scenario	If you cash in after 15 years
Total costs	EUR 4,598
Annual cost impact (*)	6.09%
(*) This illustrates how the costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 13.48 % before costs and 7.4 % after costs.	

### Composition

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the holding period and the meaning of the different cost categories.

Reduction in yield (RIY) per year for an investment of EUR 10,000		
One-off costs upon entry or exit		
Entry costs	The cost consists of the amount you pay at the beginning of the investment in the form of the Upfront Fee and the AIFM Fee. The maximum amount you will be charged will be equivalent to 1% of your capital commitment as a one-off payment and 0.05% of the Fund's total commitment in Year 1. Your Subscription Application will provide details of the applicable fee for your particular investment.	0.26%
Exit costs	Exit costs are not relevant as they do not apply if you keep the product for the recommended investment period. No exit costs are anticipated, as any costs incurred in connection with the early redemption and repurchase of partnership interest during the investment period will be borne separately by the investors involved.	0.00%
Ongoing costs		
Management fees and other administrative or operating costs	The cost consists of ongoing operational costs associated with management of the Fund. This includes costs relating to fund administration, depositary, audit and similar administrative costs. It also includes other costs, consisting of the AIFM Fee, Management Fee to NIO. Like fund cost, financing cost and the management fee to CI VI. This is a %-wise estimate based on the expected costs and includes CI VI fund level costs.	4.68%
Transaction costs	This is an estimate of the costs associated with the Fund's investments. The cost covers the estimated cost of legal and tax due diligence. The actual amount will vary depending on how much the Fund buys and sells. The cost is covered by the Management Fees received and is not charged separately.	0.00%
Incidental costs taken under specific conditions		
Performance fees (carried interest)	NIO does not receive performance fees or carried interest. However, CIP receives carried interest on the investment result of CI VI, which is deducted from the return. The actual amount will vary depending on the performance of the investment. The estimate of aggregate costs presented is based on historical data. CIP will receive 20% carried interest from the time the IRR of CI VI exceeds 7%.	1.15%

### How long should I hold it, and can I take my money out early?

The Product has a holding period of approximately 14 years and is intended for retail investors with a long investment horizon. The holding period of the Product follows the investment period of CI VI. No option is generally offered to cash in or sell back the partnership interests from time to time during the holding period. The partnership interests are generally non-transferable.

### How can I complain?

Any complaints about the Product may be addressed in writing to the complaints responsible person with Nordic Investment Opportunities A/S and submitted on this webpage or sent by letter or email to this address:
