

Are you motivated by private markets investing and making complex investment topics clear, understandable, and relevant for investors?

NIO Partners is looking for an Investment Associate to join our Copenhagen-based investment team in a role sitting at the intersection of investing, communication, and the development of new AI-enabled ways of working.

About NIO Partners

NIO Partners is a leading manager of alternative investment funds, providing professional investors, from family offices and foundations to institutions and high-net-worth individuals, with access to best-in-class private market investments. We invest with leading global private equity, infrastructure, credit, and real estate managers both through funds as well as co-investments, managing more than EUR 3bn on behalf of our clients.

Joining our five-person, and growing, investment team, you will become part of a collaborative culture built on integrity, high professional standards, and a dynamic work environment. You will be joining a growing and ambitious organisation founded by industry pioneers, with a clear growth journey ahead.

The role

We are looking for a candidate with a strong interest in investing and private markets, combined with the ability to communicate complex topics clearly and convincingly.

The role sits within the investment team and focuses on helping shape how NIO's investments, strategies, and market perspectives are communicated externally, as well as supporting the investment team in the identification, execution, and monitoring of NIO's investments.

You will work across investment materials and investor communication and play a role in developing how AI is integrated into our workflows, improving both the quality of our communication and how we operate internally.

Responsibilities include

- Translating investment strategies, market developments, and portfolio insights into clear and compelling communication for investors and clients
- Owning and developing investment-related materials across presentations, fund decks, one pagers, brochures, launch emails, and other client-facing materials
- Participating in the investment process, including research, due diligence, and portfolio monitoring, with travel activity to be expected
- Supporting internal materials and insights for Investment Committee discussions and decision-making
- Helping strengthen AI-enabled workflows, automation, and knowledge-sharing processes across the organisation
- Identifying opportunities where AI and technology can improve workflows, communication quality, and internal efficiency

Qualifications include

- A master's degree in a relevant field with strong academic performance
- 0–2 years of experience, or graduating in summer 2026
- Strong communication, storytelling, and PowerPoint skills
- Strong analytical skills and having a structured approach to working
- Genuine interest in investing, private markets, and investment products
- Curiosity around AI, automation, and technology
- A proactive mindset, attention to detail, and willingness to take ownership

NIO offers

- A unique role at the intersection of investing, communication, and AI-enabled process development
- Exposure to leading alternative investment managers and private market strategies
- A steep learning curve and responsibilities that grow with talent and ownership rather than seniority
- A supportive and ambitious culture where we grow together
- The opportunity to help shape how NIO communicates its investments and develops future ways of working

If this aligns with your career aspirations, please send your application, CV, and academic transcripts by June 12th, 2026, to recruiting@nio.partners. We will be interviewing on an ongoing basis. We are committed to building a diverse and inclusive workplace and strongly encourage applications from candidates of all backgrounds. Questions regarding the position may be directed to Director, Olle Thelin, at olle.thelin@nio.partners or Vice President, Jakob Granlund, at jakob.granlund@nio.partners. All applications will be treated confidentially.
